Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 7: Simulation 1 - Condition 7: Full Model, Exogenous = Right-skewed, Epsilon = Normal, Zeta = Normal, N = 400, Reliability = 0.4

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 12: Simulation 1 - Condition 12: Full Model, Exogenous = Right-skewed, Epsilon = Normal, Zeta = Normal, N = 1000, Reliability = 0.8

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 17: Simulation 1 - Condition 17: Full Model, Exogenous = Uniform, Epsilon = Normal, Zeta = Normal, N = 400, Reliability = 0.8

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 22: Simulation 1 - Condition 22: Full Model, Exogenous = Normal, Epsilon = Exponential, Zeta = Normal, N = 1000, Reliability = 0.6

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 32: Simulation 1 - Condition 32: Full Model, Exogenous = Uniform, Epsilon = Exponential, Zeta = Normal, N = 1000, Reliability = 0.4

Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 39: Simulation 1 - Condition 39: Full Model, Exogenous = Normal, Epsilon = Normal, Zeta = Exponential, N = 400, Reliability = 0.6

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 46: Simulation 1 - Condition 46: Full Model, Exogenous = Right-skewed, Epsilon = Normal, Zeta = Exponential, N = 1000, Reliability = 0.6

Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 53: Simulation 1 - Condition 53: Full Model, Exogenous = Uniform, Epsilon = Normal, Zeta = Exponential, N = 400, Reliability = 0.8

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 60: Simulation 1 - Condition 60: Full Model, Exogenous = Normal, Epsilon = Exponential, Zeta = Exponential, N = 1000, Reliability = 0.8

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 65: Simulation 1 - Condition 65: Full Model, Exogenous = Right-skewed, Epsilon = Exponential, Zeta = Exponential, N = 400, Reliability = 0.8

Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note.

MCSE = Monte Carlo Standard Error shown as $\pm$ value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note.

MCSE = Monte Carlo Standard Error shown as ± value. Coverage, Type I Error, and Power expressed as percentages. — indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table 145: Simulation 2 - Condition 1: Full Model, Exogenous = Normal, Epsilon = Normal, Zeta = Normal, N = 400, Reliability = 0.4
