Performance Measures**

Table S1*Complete performance measures for evaluating parameter estimates in the simulation studies*

Performance Measure	Empirical Calculation	MCSE
Mean-Based Metrics		
Absolute Bias	$\bar{B} - \beta$	$\sqrt{S_B^2/K}$
Relative Bias	$(\frac{\bar{B}}{\beta}) - 1$	$\sqrt{S_B^2/(K\beta^2)}$
Percent Relative Bias	$\left[(\frac{\bar{B}}{\beta}) - 1 \right] \times 100\%$	—
MSE	$\frac{1}{K} \sum_{k=1}^K (B_k - \beta)^2$	$\sqrt{\frac{1}{K} [S_B^4(k_B - 1) + 4S_B^3g_B(\bar{B} - \beta) + 4S_B^2(\bar{B} - \beta)^2]}$
RMSE	$\sqrt{\frac{1}{K} \sum_{k=1}^K (B_k - \beta)^2}$	$\sqrt{\frac{K-1}{K} \sum_{j=1}^K (\text{RMSE}_{(j)} - \text{RMSE})^2}$
Relative MSE	$\frac{(\bar{B} - \beta)^2 + S_B^2}{\beta^2}$	$\sqrt{\frac{1}{K\beta^4} [S_B^4(k_B - 1) + 4S_B^3g_B(\bar{B} - \beta) + 4S_B^2(\bar{B} - \beta)^2]}$
Relative RMSE	$\sqrt{\frac{(\bar{B} - \beta)^2 + S_B^2}{\beta^2}}$	$\sqrt{\frac{K-1}{K} \sum_{j=1}^K (\text{rRMSE}_{(j)} - \text{rRMSE})^2}$
SE/SD Ratio	$\bar{S}E/S_B$	—
Rejection Rate	$r_\alpha = \frac{1}{K} \sum_{k=1}^K I(P_k < \alpha)$	$\sqrt{r_\alpha(1 - r_\alpha)/K}$
Coverage	$c_\beta = \frac{1}{K} \sum_{k=1}^K I(L_k \leq \beta \leq U_k)$	$\sqrt{c_\beta(1 - c_\beta)/K}$
Average Width	$\bar{W} = \bar{U} - \bar{L}$	$\sqrt{S_W^2/K}$
Median-Based Metrics		
Median Bias	$Mdn(B) - \beta$	—
Relative Median Bias	$\frac{Mdn(B) - \beta}{\beta}$	—
Percent Relative Median Bias	$\frac{Mdn(B) - \beta}{\beta} \times 100\%$	—
MAD	$Mdn(\ B_k - Mdn(B)\)$	—
Median RMSE	$\sqrt{\text{Bias}_{Mdn}^2 + \text{MAD}^2}$	—

Note. B = estimator for parameter β ; K = number of replications producing estimates $B_1, \dots, B_K$; $\bar{B} = (1/K) \sum_{k=1}^K B_k$ = sample mean;
 $S_B^2 = (1/(K-1)) \sum_{k=1}^K (B_k - \bar{B})^2$ = sample variance; $S_B = \sqrt{S_B^2}$ = sample standard deviation; $\overline{SE} = (1/K) \sum_{k=1}^K \widehat{SE}_k$ = mean standard error; k_B = standardized kurtosis; g_B = standardized skewness; $I(\cdot)$ = indicator function; P_k = p-value from replication k ; α = significance level; L_k, U_k = lower and upper CI endpoints; S_W^2 = variance of CI widths; r_α and c_β denote rejection rate and coverage, respectively; $Mdn(B)$ = sample median of estimates; MAD = median absolute deviation with scaling factor 1.4826. MCSE = Monte Carlo Standard Error, dashes indicate MCSEs not computed. MSE = Mean Squared Error. RMSE = Root Mean Squared Error.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash 00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash 02014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S18

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S23

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash$ u00b1 value. Coverage, Type I Error, and Power expressed as percentages. $\backslash$ u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S41

Simulation 1 - Condition 41: Full Model, Distr = Normal, Epsilon = Normal, Zeta = Right-skewed, N = 400, Reliability = 0.8

Note. MCSE = Monte Carlo Standard Error shown as $\backslash 00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash 0214$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S53

Simulation 1 - Condition 53: Full Model, Distr = Uniform, Epsilon = Normal, Zeta = Right-skewed, N = 400, Reliability = 0.8

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash$ u00b1 value. Coverage, Type I Error, and Power expressed as percentages. $\backslash$ u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as $\backslash u00b1$ value. Coverage, Type I Error, and Power expressed as percentages. $\backslash u2014$ indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S206

Simulation 2 - Condition 62: Full Model, Distr = Right-skewed, Epsilon = Right-skewed, Zeta = Right-skewed, $N = 1000$, Reliability = 0.4

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002f0 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S228

Simulation 2 - Condition 84: Linear Model, Distr = Right-skewed, Epsilon = Normal, Zeta = Normal, N = 1000, Reliability = 0.8

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002f0 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S245

Simulation 2 - Condition 101: Linear Model, Distr = Right-skewed, Epsilon = Right-skewed, Zeta = Normal, N = 400, Reliability = 0.8

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u000b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Table S261

Simulation 2 - Condition 117: Linear Model, Distr = Right-skewed, Epsilon = Normal, Zeta = Right-skewed, N = 400, Reliability = 0.6

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u000b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u000b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002f0 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u002014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.

Note. MCSE = Monte Carlo Standard Error shown as \u00b1 value. Coverage, Type I Error, and Power expressed as percentages. \u2014 indicates relative measures are undefined when true value equals 0 and non-existent results for Type I error rate which was evaluated only for nonlinear effects.
